TOPIC DEALT WITH:

Concept of Entrepreneurship

Entrepreneurship is the ability and readiness to develop, organize and run a business enterprise, along with any of its uncertainties in order to make a profit. The most prominent example of entrepreneurship is the starting of new businesses.

In entrepreneurship connected with land, labour, natural resources and capital can generate a profit. The entrepreneurial vision is defined by discovery and risk-taking and is an indispensable part of a nation's capacity to succeed in an ever-changing and more competitive global marketplace.

MEANING OF ENTREPRENEUR

The entrepreneur is defined as someone who has the ability and desire to establish, administer and succeed in a startup venture along with risk entitled to it, to make profits. The best example of entrepreneurship is the starting of a new business venture. The entrepreneurs are often known as a source of new ideas or innovators, and bring new ideas in the market by replacing old with a new invention.

MUSHROOM FARMING

Mushroom farming is one of the most profitable agri-business that you can start with a low investment and less space. Mushroom farming in India is growing gradually as an alternative source of income for many people.

Nutritional Value of Mushrooms

Mushrooms contain more protein than fruits & vegetable and, Mushrooms can also be low in cholesterol. Apart from their protein content, mushrooms can also be high in certain vitamins like B, C, vitamin D, riboflavin, thiamine nicotinic acid.

Mushroom Cultivation in India

In India, a marginal farmer and small manufacturing units produce Fifty percent of mushroom and the remaining mushroom produce by industrial institutions.

There are two types of mushroom growers in India, seasonal farmers produce in small scale.

While commercial mushroom farmer who takes production continue entire year in large scale.

Mostly both develop white button mushroom to your domestic market and export.

Before making to start mushroom farming decision following Factors have to be Considered to become successful in commercial mushroom production business :

1. The mushroom farm should be closer to the house of the farmer for successful Participation and monitoring purpose
2. Availability of lots of water in the farm
3. Easy accessibility to raw materials at competitive prices in the region
4. Simple access to labor at more affordable prices.
5. Availability of power at competitive prices, as electricity is a significant input in mushroom cultivation
6. The farm should be from industrial pollutants such as chemical fumes,
7. There should be provision for sewage disposal
8. There should be provision for future growth in the farm.
